HydraTech Engineered Products FRP

December 2009 Vol. 64 No. 12

HydraWrap is an FRP (Fiber Reinforced Polymer) repair system engineered to restore or enhance the structural integrity of pipe and infrastructure.

Each HydraWrap system is a uniquely designed high performance Carbon Fiber Reinforced Polymer Composite that consists of a 100 percent solids high build epoxy Primer, a 100 percent solids epoxy Wet-Out resin, and carbon fiber fabric. The primer provides excellent adhesion to a variety of substrates while allowing a sag free application at high film builds.

The Wet-Out resin is designed to thoroughly wet out the fiber forming a composite matrix with a very high tensile and flexural properties. HydraWrap provides a rapid, chemical and corrosion resistant structural repair with no hot work required. 513.827.9169, hydratechllc.com
